Improves Dyslipidemia by Inhibiting VLDL Secretion Through Modulation of AT1 Receptor Signaling Pathways. We have previously reported that telmisartan, an angiotensin receptor blocker, attenuates hepatic lipase (HL) activity in high-fat diet-fed Wistar rats. In this study, we investigated whether these actions of telmisartan on HL and dyslipidemia were caused by inhibition of angiotensin II type 1 receptor (AT1R). Male Wistar rats were orally administered 5 mg/kg/day telmisartan for 6 weeks. Plasma lipid profiles, AT1R, lipoprotein lipase (LPL) and HL activity were measured in both liver and adipose tissue. Lipoprotein profiles were analyzed in blood collected from the inferior vena cava. Protein levels of AT1R, p38MAPK, p-p38MAPK, p-PKC, and p-IKK β in the liver were measured

Implementing a Dental Emergency Plan By: Dr. Jodi Meyer

When your phone rings, don't answer, if your head is spinning, don't answer, if you're driving, don't answer. Do whatever you have to do to avoid answering your phone, however, don't expect an email or text message to be left that will tell you about an emergency. You're never going to get those notifications unless it is critical. Let's look at a Dental Emergency

When you do something that puts you at risk, I'll bet you don't take any chances with it. When you are at the dentist office for a cleaning, are you taking any chances? A dental emergency can happen anywhere. If you are in your car or vehicle, and a dental emergency occurs, do you really think you're going to be able to reach your phone? I don't think so, so chances are your phone is probably with you. Take the time to put together a dental emergency plan. Include your

emergency contact numbers and email addresses, who you are meeting with and any other important information you need to have in the plan. You might even have an envelope with it in your vehicle to have a copy on your person in case of an emergency. Make sure you also have a well-stocked first aid kit in your vehicle in case you become injured. It might be a good idea to have your dentist give you a list of recommended products for your first aid kit. Practice your dental emergency plan To make sure that you really do have a plan, and it is easy to remember, practice it. Before you leave home, when you're driving to your appointment, before you go into the office and before you arrive home from your appointment, practice saying your emergency contact information out loud. When you're alone in your vehicle, practice saying your emergency contact information out loud. Make a
