gnome-terminal This is a discussion on gnome-terminal within the C++ Programming forums, part of the General Programming Boards category; Hi, I use "gnome-terminal" in a loop but it returns same results. I think it is the read of...
Hmm there is a typo in the man page. I have the following script which runs a program in a terminal. When the program returns 0, it is supposed to kill the process. `#!/usr/bin/env gnome-terminal sleep 100 ; do echo x > /dev/null ; pwc-window --ok --title 'Processing' & ; sleep 20 ; echo x > /dev/null ; pwc-window --ok --title 'Processing' & ; sleep 20 ; echo x > /dev/null ; pwc-window --ok --title 'Processing' & ; sleep 20 ; pwc-window --ok --title 'Processing' & ; sleep 100 done`
The gnome-terminal hangs when it is supposed to send "quit" to the process. How can I get gnome-terminal to send "quit" to the process?/* * Copyright (c) 2016, 2017, 2018, 2019, 2020 FabricMC * * Licensed under the Apache License, Version 2.0 (the "License"); * you may not use this file except in compliance with the License. * You may obtain a copy of the License at * * * * Unless required by applicable law or agreed to in writing, software * distributed under the License is distributed on an "AS IS" BASIS, * WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. * See the License for the specific language governing permissions and * limitations under the License. */ package net.fabricmc.fabric.impl.client.input.particle; import java.util.List; public class ParticleCloud extends BaseParticleType { public float distance = 0; public float powerScale = 0; public float maxDistance = 0; public float range = 0; public float size = 0; public float power = 570a42141b
