Inspired by casual (or should we say 'slimecrapping') classic video games like WarioWare and Worms, Super Slime Arena (SSA) is a fast-paced, fun-filled single-screen, competitive fighting game based on lovable, wacky creatures. Fights aren't the most serious affair, with winning getting you a 'Piglet' medal and losing either getting you a 'Salmon', or an even sadder 'Fish'. All you have to do to start a fight is aim at a slime — pressing the 'A' key will automatically fire your slime at your opponent, be it a monster or another player. It can be charged up to blow, and when you hit the other player, the rest of the slime explodes. If you land a successful hit, you can use the remaining slime to launch at the target, or power up your 'Hammer' slime to hit for even more damage. The game includes tons of playable characters, as well as 60+ stages, both of which grow more challenging with difficulty level. The game supports one-on-one or two-player cooperative multiplayer — the more people playing, the higher a player's rank will get. Features: Play solo or with friends for unique gameplay Unlock additional characters as you play, giving you the chance to start training your favorite slime Complete more than 60 stages with varied environments Train and evolve your slimes to unique and original beasts in the 'Slime Yard' Discover the life cycle of different species as you play the game Get to know the characters you've trained as they go through their life cycle Different appearances, enemies, and rewards Arcade-Style, Stylish Combat Each slime in Super Slime Arena has five abilities to use, including a Bomb, Hammer, Stun, which you can power up, and charge up to cause an explosion, or a throw, which leaves you with a combo meter. Power-ups and combos make the game more interesting, allowing you to feel the 'epic' game-like experience of being a 'pro' and making sure you get your 'piglet' or not! Using combos and power ups, you can easily increase your score. Each game has a level restriction in place that caps the

What's new in DDS (D.I.Y Drone Simulator):

Location: Ballistic Command Restricted Area Date: May 25, 2021 Time: 1436 Report Summary: Delta squad reports that several internal barracks and medical units are in the middle of a disease outbreak after a house clearance for explosives. Unit disposition of personnel is not necessary, and currently all personnel in the Residential Command Restricted Area are to be quarantined. At 1420, units 5-8 moved into the Residential Command Restricted Area. Units 5-8 report that the Joint Forces Custodian Restricted Authority in the Medical Command Restricted Area is decontaminating the area. The loss of both B and C Company squads due to disease outbreaks is to be reported in the morning after administration. By the end of 14:30, it is reported that the first four companies had cleared their sector, and that site security was being provided by a swing company of units 8-12. The Medical Command Restricted Area was cleared by fifteen minutes later. Personnel assigned to the RSA in C Company reports that the rooms were already live for DOBs, and all such rooms were to be quarantined. Units 5-8 request a site pass for the perimeter of the most secure area of the site, and then report in their dispersed configuration for this incident. Analysis: By majority vote, units 3-8 report to the Protective Engagement section of BALCO as a result of this incident, and will coordinate with Unit 5. As protection is required, Unit 3-8 ordered 67 personnel into the Protective Engagement section. Operation: Despot Location: Bangardan Date: June 17, 2021 Time: 1045 Report Summary: Someone in the Facility Command Restricted Area suffered a severe chemical burn sustained while attempting the decontamination of the area, the injury is not life-threatening. Immediate personnel action directives are required for a hexamine decontamination treatment and team to SCP-61 and Case Blue. Anyone attempting decontamination of the area will receive two hours of treatment followed by a thirty-minute sedation session. By 2030, six despatched squads reported that the treatment session was complete. One of the squads that had discovered the chemical exposure reported having observed SCP-61, and two other squads reported that SCP-61 was actively moving through the site. Units 3-8 moved out to secure the site, and a contingent will link with Unit 5. Person

Free DDS (D.I.Y Drone Simulator) [Win/Mac] [Updated]

Simple but challenging yet not easy game Menu design is creative. No instructions needed Low intense and scary atmosphere 4 main chapters with 15 levels each Numerous save points, timer and save slots Main differences between Octave release and the original: Full 3D graphics Original soundtrack Steam achievements About the Developer: Vadien is a young developer based in New York City. He was born in Poland and currently lives there. After a few years of making and releasing indie games Vadien decided to take a step back and teach himself to make video games. In 2015 he found out that he really enjoyed the coding and creating of games and the new goal of his life is to make awesome games for everyone. A: Octave is a "point n click" game with adventure elements, which, as the name indicates, is also quite similar to the original point n click, which was made by Lucasarts. Gameloft has renamed and rereleased the game in October 2012 as Octave. A version of the game can be found on their website, however I'm unaware of any mobile version of the game. Q: Preserving vector order in triplets to be ordered in tibble I want to arrange tibble in group format with df
