Videos Gameplay: www.youtube.com/StarlightDrifterGameplay Player Comments: Starlight Drifter is a strangely put together visual novel with a unique gameplay and a decent story. The graphics are great and the voice actors make the story very immersive. The game has a strong musical score that you can not only listen to, but also use in-game to further help you along. Although sometimes not completely in-line with the game, I love how much skill and storytelling that have gone into the game. Still one of my favorite recent games. There is a lot of immersion into the world, I like the story a lot and I did not regret spending time on it. I like the concept of being in control of your own experiences in Starlight Drifter. It makes it a very interesting and immersive experience as the player is given a degree of freedom to follow the story. There are several obstacles that can be overcome within the game to progress the story and once played I found it more interesting than some visual novels or tales I've played recently. The interactions between characters are fleshed out well and enjoyable. The story is simple but the characters are engaging with the multiple endings along the way providing a nice variation of results. I enjoyed all of the characters and am definitely looking forward to more stories involving them. I thought Starlight Drifter had a lot of potential and I'd recommend giving it a go. Wednesday, October 5, 2014 Travel is different everywhere. Weird people wander around everywhere too. This weekend I'm walking around warm climates like in Panama and Ecuador. Less than 24h later I'm walking down the autobahn in Germany. Which is just about as far apart I have ever had to walk. It is pretty hard to describe the differences between the places around the world, but if you are reading this, you probably already know. So I guess you are up for a comparison I have prepared. This mix will include all the countries I have visited so far, not only the whole region. This way, you can see the similarities of different cultures and see what parts of the world are cut out for me or not. Some of you might get something unexpected out of it ? Wanderlust Adapters! (Note: I currently work in translating jobs, and cannot travel much on vacation – so therefore I can't recommend much national Parks and things of that kind. I'm sorry! I just did not have the time to visit all of the places ?) Rainforest – Evergreen I'm pretty sure I will end up in a rainforest eventually. I'm a summertime kind of girl. Living and working outdoors and at the beach outside of London is right up my alley! But I'm also starting to feel a little bit too much like "his" jungle, which is highly uncommon. Pretty much the jungle is a chicken or a close relative ? I don't think a one-year-old chimpanzee seeing its first palm tree can say to its mother the next day "Hey mom! That palm tree looks cool! Let's go there!" – but I just might. Depending on the location. (Oh yes, the scientific name I gave the palm tree has turned out to be the only one for the kind in the world!) Sunday, September 23, 2014 I'm super thankful for my part-time job again! Not only do I have to stay at the fieldwork place, but I also have to drive as much as possible. It's pretty much impossible to pick up the company car from the petrol station before my work hours, but you can often find a garage for cheap on a bus or train ride. After all, in Germany you can quickly and easily
