Q: C# Regex replace invalid characters with a single whitespace I have a string that is a sequence of numbers separated by a whitespace. Example: 1-123-456-7890 Now this string could contain only digits or whitespace, but not both. I want to replace all whitespaces with a single space and of course have to retain all numbers. The following works for whitespaces: (?C-terminal cleavage of steroid 21-hydroxylase in prepubertal boys with congenital adrenal hyperplasia. We measured the amount of cleavage of the C-terminal propeptide of steroid 21-hydroxylase by using a highly sensitive and specific radioimmunoassay in plasma from a group of

If you have any questions for AWS, please let me know. Regards, Glen One of the most common mistakes I've seen in AWS web applications is a flawed autoscaling process that adds or removes instances from an Amazon EC2 Compute Environment (for example, Elastic Beanstalk) without running through the Security Groups and Auto Scaling rules to ensure that the instance is permitted to access the Internet. Here are two common problems: a... Read More If you're running an AWS Simple Storage Service (S3) application, then you've probably run into the situation where you need to expand your storage capacity. Maybe you've created a bucket that is too small, and you want to add more space. Or, perhaps you need to use the default storage quotas provided by AWS, but you're running out. There are... Read More When you use an Amazon EC2 Compute Environment such as Amazon Elastic Beanstalk, you can customize your web applications and add custom script files.
