Campaign Cartographer 3 (Free PC Software) - All-in-one software to convert rtf,.pdf, Moto Mods: An upgrade path for all Motorola devices - matthewbauer ====== tn13 If anything, I think this will make more Moto phones than made sense as a _phone_. There are plenty of phones

which would benefit from camera flash etc. adapters/chargers. My original Moto G had a battery life of 5 hours. But since then I have two newer phones which have better battery lives. However, they are much bulkier than my original Motorola. ~~~ ryanglasgow Could you expand on why your battery life is better with a newer phone? Do they just have better battery tech, or is there a significant difference in their software? ~~~ tn13 I think battery life improved because better batteries and better software management. Software was more efficient. ~~~ monokrome Your battery life has probably improved because it's not being forced to use the camera as much. But I don't believe Moto Mods are to blame for the battery life. ------ rdslw Everbody is not happy. // Copyright 2020 TiKV Project Authors.
