The Music Business and Aural Studies Programs. Music Education. Degree Program Description: The Music Education degree program at the University of Wisconsin-Eau Claire focuses on the musical and aural development of students. Through extensive study of music and language acquisition, students develop skills in several areas: learning skills, understanding music, and learning to communicate. It offers students a perfect combination of structure and individualized learning to ensure success in the formative years of a student's life. In aural courses, students receive attention from department faculty as well as other musical educators, while in music courses students receive direct exposure to the experience of professional musicians. A word of wisdom: It may be a good idea to take a semester or two off in the middle of your undergraduate program before entering graduate school. You'll be able to focus your attention on your studies and won't end up going into university ten years late.

1. Field of the Invention The present invention generally relates to an engine control system, and more particularly to an engine control system that is capable of returning a system to a target revolution number with the ignition timing and the fuel injection amount changed when the engine is stopped due to actuation of an engine lock mechanism. 2. Description of the Prior Art When an engine stops in the deceleration phase of the vehicle because of actuation of an engine lock mechanism, the engine revs decrease to the idle revolution number. Therefore, when the ignition timing and fuel injection amount are changed in a usual manner to return the engine to a target revolution number, it may happen that an actual revolution number of the engine is overshoot the target revolution number. This may result in engine stalling, which cannot be avoided. To solve this problem, Japanese Patent Laid-open Publication No. 7-300422, for example, describes a technique of discharging a clutch lock pressure to set an engine revolution speed above a normal idle number when the
